

Incident & Support Analytics Report

Generated on January 19, 2026 at 05:08 PM

Executive Summary

This report provides an operational overview of incident and support activity. A total of **30** tickets were analyzed, with an average resolution time of **12.72 hours**. 71.4% of tickets were resolved within SLA. The analysis highlights workload distribution, resolution efficiency, and potential bottlenecks affecting support performance.

Key Support KPIs

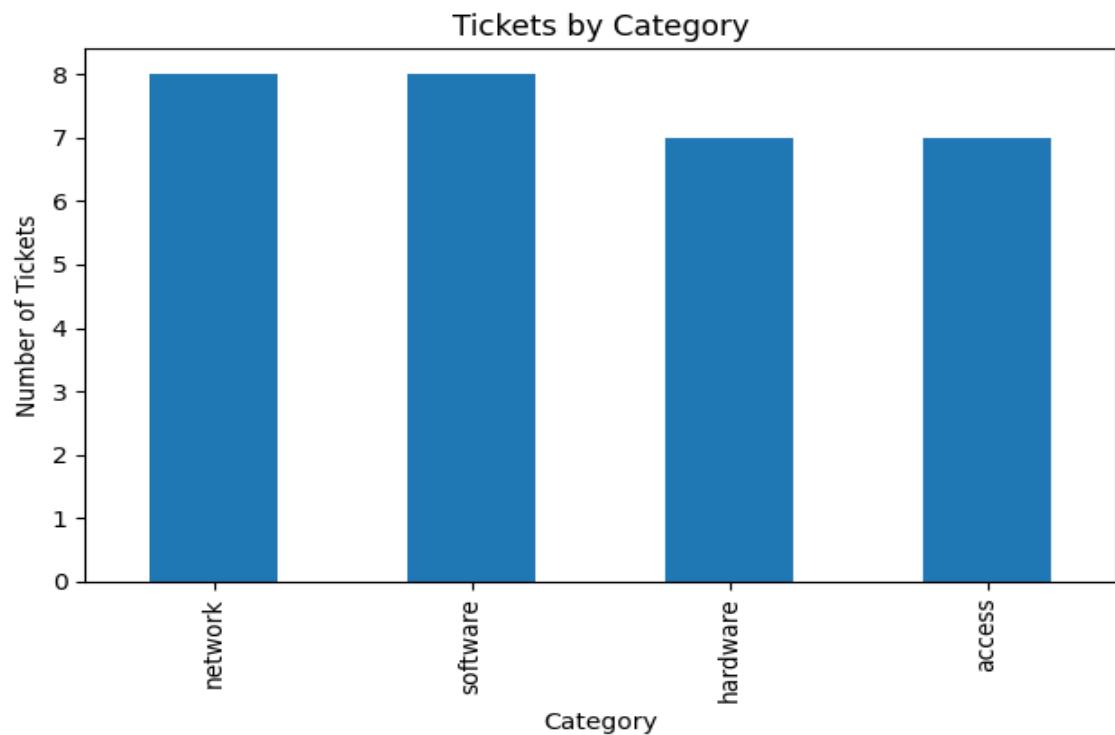

Metric	Value
Total Tickets	30
Average Resolution Time (hrs)	12.72
Median Resolution Time (hrs)	8.67
SLA Compliance (%)	71.4%
Open Tickets	9
Most Frequent Category	network
Slowest Resolution Category	hardware (19.06 hrs)
